

Dive for fun, dive safely, dive certified. Whether a first time or experienced diver, diving in Belize will be a great experience.

There is no shortage of certified divemasters and instructors as well as experienced boat captains to ensure your safety and enjoyment of Belize's coral-studded waters.

Choose one or a combination of the following to create your own special dive adventure:

- Join a scheduled tour to specific dive sites for the day
- Reserve a dive package via your mainland or offshore dive resort
- Spend your vacation on one of the liveboard dive boats which move between the reef and atolls of Belize.
- Arrange a private charter with a dive operator for an exclusive experience.

Hundred of divers flock to Belize on trips arranged by their local dive shops, on repeat annual dive vacations, to get their open-water or advanced certification in Belize's warm waters or, to experience diving for the first time via a "Discover Scuba" program.

Certification is available for PADI, NAUI and in some areas, NITROX diving.
